ABSTRACT

This bibliography attempts to bring together references from the medical and social sciences which focus on the physical and emotional factors associated with the pregnancy and postpartum periods. Of special importance are manuscripts which deal with maternal, parental, and marital reactions during the pregnancy and postpartum periods among primiparous couples. The primary purpose of this bibliography is to stimulate and facilitate research into the social psychology of childbearing, particularly the investigation of how the unborn and newborn child affects parental and marital behavior. TRANSITION INTO PARENTHOOD:

THE SOCIAL PSYCHOLOGICAL EFFECTS OF THE FIRST CHILD ON MARITAL AND PARENTAL BEHAVIOR

A General Bibliography

November 1974

Charles R. Figley

Child Development and Family Life

Purdue University

The following bibliography attempts to bring together references from the medical and social sciences which focus on the physical and emotional factors associated with the pregnancy and postpartum periods. Of special importance are manuscripts which deal with maternal, parental, and marital reactions during the pregnancy and postpartum periods among primiparous couples. The primary purpose of this bibliography is to stimulate and facilitate research into the social psychology of childbearing, particularly the investigation of how the unborn and newborn child affects parental and marital behavior.
